

Unit 1 | London Brentwood Commercial Park

126,307 sq ft | CM13 3LS

Ability to provide temperature-controlled warehouse solutions

Unit 1 at London Brentwood Commercial Park is designed for optimal flexibility, delivering high quality warehouse space that can be customised to suit your bespoke operational requirements.

Our enhanced specification features the market-leading CA Twin-Therm® Built-Up Roof and Wall system, complete with the advanced CA Twin-Therm® Chronus upgrade.

Delivering a superior building envelope with excellent thermal performance, the warehouse is engineered to deliver a 'chilled' environment as low as 0°C, eliminating the requirement for a 'box within a box' design.

The system can facilitate an easy change to 'chill-store' with the building's quick-release external roof lights. Allowing the void to be filled with insulation, this eliminates solar gain and improves the thermal performance of the roof.

Technical specification:

- + Internal temperatures achieved of 0°C upwards
- + Enhanced air tightness to achieve 'chill store' requirements
- + 25-year system guarantee, with a 40-year guarantee for the coating
- + Confidex Sustain® zero carbon building envelope system, certified by Tata Steel.

Accommodate single chill store or sub-divided multi-temperature areas (suitable for temperatures from 0°C upwards)

Minimise heat loss / gains for enhanced thermal performance

Optimal environmental conditions to store a range of products

Maximise storage volume, with no requirement for secondary internal build

Improve energy conservation

Superior air tightness of 1.47m³.h⁻¹.m²@50Pa for improved temperature control

Enhanced EPC rating of A+ (-35)

1,050kWp solar PV system to help offset the building's power needs

Power – 1MVA with the ability to significantly increase
