Sustainability is at the heart of Ascent, with high BREEAM ratings, electric vehicle charging points, PV panels, rooftop beehives, and a new on-site box cafe designed to reduce waste and energy consumption.

Reducing Carbon Emissions

Ascent 2 has prioritised the retention and refurbishment of the existing building instead of building new, saving almost 7,000 tonnes in embodied carbon emissions

Sourcing Materials responsibly

All timber has a chain of custody certification such as FSC, and all other key materials are responsibly sourced.

Certification

Through considered sustainability initiatives, Ascent 2 is targeting BREEAM Excellent

Targeting EPC B

Ascent 2, with a target EPC B, is committed to the belief that EPCs have a vital role to play in helping the country achieve its net zero targets

Reclaimed materials

Several items are being retained, fully refurbished and re-used to reduce the embodied carbon emissions

Optimising Recycling

A life cycle materials assessment has been undertaken in order to optimise procurement and prioritise materials with recycled content and low embodied carbon

Energy Reduction

A strategy to reduce operational carbon emissions associated with the building has been implemented, including LED lighting with PIR sensors, PV panels and air source VRF air conditioning units

Greener Choices

With our environmentally conscious Box Park Cafe, Electrical Vehicle charging points and bicycle racks across the park, we make it easy for our community to make greener choices
